Tuesday, May 17th, 2022

Time	Topic	Presenters
9:00am– 10:30 am	RCAP Regulatory Review: This presentation provides an overall look at the regulatory requirements facing small system operators and offers solutions to maintain and achieve compliance under the SDWA.	Tom DeLaura Ted Meckes
10:30 am– 12:00 pm	Distribution System Infrastructure and Water Quality: This presentation identifies assets within the water distribution system and covers problems with common components (piping, valves, storage tanks, and hydrants), and how they can drastically affect water quality, and as a result, public health. It also provides preventive actions and solutions to common distribution system problems.	Tom DeLaura Ted Meckes

Wednesday, May 18th, 2022

Time	Topic	Presenters
9:00 am– 10:30 am	Controlling Lead and Copper in Drinking Water Systems: This presentation provides an overview of the requirements that address lead and copper in drinking water, particularly in small water systems.	Tom DeLaura Ted Meckes
10:30 am– 12 noon	Source Water Protection: This presentation offers basic understandings of the role of source water assessment and protection in guarding public health. It also presents an understanding of the development of a Source Water Assessment Program (SWAP) along with a working knowledge of when and how to update a Source Water Assessment Program.	Tom DeLaura Ted Meckes
